Hydrobiologia

The International Journal on Limnology and Marine Sciences

Contents, Volume 392

Volume 392, Part I

Special Issue: **Sediment–Water Interaction 9**
Sub-Editor: **H.L. Golterman**

Two Editorial Notes 1

The effects of sediment desiccation on the potential for nitrification, denitrification, and methanogenesis in an Australian reservoir
by A.M. Mitchell & D.S. Baldwin 3–11

Fractionation of phosphate in sediments of four representative mangrove stages (French Guiana)
by A. Fabre, Fr. Fromard & V. Trichon 13–19

Changes in sediment phosphate composition of seasonal ponds during filling
by A. Díaz-Espejo, L. Serrano & J. Toja 21–28

Quantification of P-flux through shallow, agricultural and natural, waters as found in wetlands of the Camargue (S-France)
by H.L. Golterman 29–39

Analysis of phosphorus retention in free-water surface treatment wetlands
by M.Z. Moustafa 41–53

Influence of bacterial density on the exchange of phosphate between sediment and overlying water
by V. Clavero, J.J. Izquierdo, J.A. Fernandez & F.X. Niell 55–63

Pore water N and P concentration in a floodplain marsh of the Lower Paraná River
by C. Villar, L. de Cabo, P. Vaithiyanathan & C. Bonetto 65–71

Impact of arsenic and antimony contamination on benthic invertebrates in a minor Corsican river
by C. Mori, A. Orsini & C. Migon 73–80

Arsenic and antimony release from sediments in a Mediterranean estuary
by C. Migon & C. Mori 81–88

Volume 392, Part II

Patch- and reach-scale dynamics of a macrophyte-invertebrate system in a New Zealand lowland stream
by K.J. Collier, P.D. Champion & G.F. Croker 89–97

Leaf litter colonization by invertebrates in the littoral zone of a small oligotrophic lake
by R.J. Pope, A.M. Gordon & N.K. Kaushik 99–112

Karyology and karyotype analysis of diploid freshwater planarian populations of the *Dugesia gonocephala* group (Platyhelminthes, Tricladida) found in Sardinia
by M. Pala, S. Casu & G. Stocchino 113–119

Zebra mussel (*Dreissena polymorpha*) seasonal colonization patterns in a sub-tropical floodplain river
by T.B. Mihuc, J.M. Battle, J.R. Mihuc & C.F. Bryan 121–128
Cladocera and Anostraca from the Interior Plateau of British Columbia, Canada, as paleolimnological indicators of salinity and lake level
by D.G. Bos, B.F. Cumming & J.P. Smol 129–141
Mussels as bioindicators of trace metal pollution in the Danube Delta of Romania
by A. Jamil, K. Lajtha, S. Radan, G. Ruzsa, S. Cristofor & C. Postolache 143–158
The abundance and trophic biology of *Clarias albopunctatus* Nichols & LaMonte, 1953 (Osteichthyes: Clariidae) in a tropical floodriver basin
by H.M.G. Ezenwaji 159–168
Genetic structure of the Iberian chub, *Leuciscus pyrenaicus*, in the Tejo drainage
by R.M. Brito & M.M. Coelho 169–177
Spatial and ecological overlap between coexisting sexual and parthenogenetic *Schmidtea polychroa* (Tricladida; Platyhelminthes)
by R.P. Weinzierl, L.W. Beukeboom, L. Gerace & N.K. Michiels 179–185
Microclimate, developmental plasticity and community structure in artificial temporary pools
by L. Blaustein, J.E. Garb, D. Shebitz & E. Nevo 187–196
Comparative responses to severe hypoxia and subsequent recovery in closely related amphipod populations (*Gammarus minus*) from cave and surface habitats
by F. Hervant, J. Mathieu & D.C. Culver 197–204
In situ survival and growth of zebra mussels (*Dreissena polymorpha*) under chronic hypoxia in a stratified lake
by N. Yu, D.A. Culver 205–215
Some characteristics of a pike *Esox lucius* L. population in an Irish reservoir
by W. Roche, M. O'Grady & J.J. Bracken 217–223
Peregrinacarus reticulatus gen. nov. spec. nov., a freshwater halacarid mite (Acari, Halacaridae) from Marion Island
by I. Bartsch 225–232
Laboratory investigations on larval development, motility and settlement of white weed (*Sertularia cupressina* L.) – in view of its assumed decrease in the Wadden Sea
by R. Berghahn & U. Offermann 233–239
A new member of the subgenus *Sinobosmina* Lieder, 1957: *Bosmina tripurae* sp. nov. (Crustacea, Cladocera) from India
by V. Kořínek, R.K. Saha & T. Bhattacharya 241–247
The distribution patterns of dragonflies (Insecta: Odonata) along the Kiewa River, Australia, and their relevance in conservation assessment
by J.H. Hawking & T.R. New 249–260

Erratum
Sinodiaptomus sarsi (Rylov, 1923) (Copepoda, Calanoida) in Turkey
by E. Gündüz 261–262
